Education & Research

Co-Curricular Education

This subcategory seeks to recognize institutions that provide their students with sustainability learning experiences outside the formal curriculum. Engaging in sustainability issues through co-curricular activities allows students to deepen and apply their understandings of sustainability principles. Institution-sponsored co-curricular sustainability offerings, often coordinated by student affairs offices, help integrate sustainability into the campus culture and set a positive tone for the institution.

From the institution:

The University of Alabama provides sustainability and environmental programs such as a Natural Resources Management Minor, Interdisciplinary Environmental Studies Minor, as well as providing students with opportunities to participate in sustainability projects. These minors allow students to participate in activities and projects such as organic farming, field trips, and visiting Tanglewood-- a 480-acre inland biological station managed by the Department of Biological Sciences. These types of learning situations help supplement the students' understanding of ecological systems as sustainable resources. The C&BA Honors Program provides Honor Students year long sustainability projects and events to coordinate and create for the campus and surrounding communities. Through the career center and New College, Bama's self-directed study department, students are directed to environmental management courses and offered internships in sustainability. These opportunities allow the students to make contacts within the environmental industry in the southeast.

Student Sustainability Educators Program

Criteria

Institution coordinates an ongoing peer-to-peer sustainability outreach and education program for degree-seeking students. The institution:

- Selects or appoints students to serve as educators and formally designates the students as educators,
- Provides formal training to the educators in how to conduct outreach, and
- Offers faculty or staff and/or financial support to the program.

This credit focuses on programs for degree-seeking students enrolled in a for-credit program. Continuing education and/or non-credit students are excluded from this credit.

Student clubs or groups, which are covered by *Co-Curricular Education Tier Two Credit 1*, are not eligible for this credit unless the group meets the criteria outlined above.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Student Sustainability Outreach Campaign

Responsible Party

Nancy Whittaker

Associate Vice President
Administration, Financial Affairs

Criteria

Institution holds at least one sustainability-related outreach campaign directed at students. The campaign yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution, a student organization, or students in a course.

To measure if the campaign yields measurable, positive results, institutions should compare pre-campaign performance to performance during or after the campaign.

The campaign could take the form of a competition (such as a residence hall conservation competition), or a collective challenge (such as a campus-wide drive to achieve a specific sustainability target).

The campaign may focus on one or more sustainability issues, but educating students is a primary feature of the campaign.

The campaign may reach additional campus members (faculty, staff, visitors, etc.) as long as students are one of the audiences of the campaigns.

The following impacts are not sufficient for this credit:

- Increased awareness
 - Additional members of a mailing list or group
-

Submission Note:

Information and stories about past Sustainability Days are located:

<http://cw.ua.edu/2012/04/18/day-to-promote-sustainability/>

<http://events.ua.edu/events/index.php?com=detail&eID=1989>

"---" indicates that no data was submitted for this field

Does the institution hold a campaign that meets the criteria for this credit? :

Yes

The name of the campaign(s) :

Go Green Website, Sustainability Day

A brief description of the campaign(s) :

Through this initiative which is housed within the the Office of Sustainability and works with the Environmental Stewardship Committee, we are trying to show students, staff, faculty and the surrounding communities what “green” practices the University of Alabama is involved in. We are also trying to provide information and connections between student groups and other “green” projects on campus. The Go Green website serves as blog, news source, providing event information, highlighting green projects, activities, educational opportunities, and recycling facts and instructions.

The Sustainability Day provides events and information all over campus increase student,staff, and faculty awareness of the recycling program, composting programs, sustainable food and purchasing of Bama Dining, as well as providing data of waste produced on campus.

A brief description of the measured positive impact(s) of the campaign(s) :

An increase of campus recycling numbers (tons). The campus recycling numbers of each fiscal year:

2008-2009- 885.8

2009-2010-1252.64

2010-2011-1316.36

The website URL where information about the sustainability outreach campaign(s) is available :

<http://www.gogreen.ua.edu/>

Sustainability in New Student Orientation

Criteria

Institution includes sustainability prominently in its new student orientation activities and programming. Sustainability activities and programming are made available to all new students and are intended to educate about the principles and practices of sustainability.

Because orientation activities vary from one institution to another, prominent inclusion of sustainability may not take the same form on each campus. When reporting for this credit, each institution will determine what prominent inclusion of sustainability means given its particular context.

As this credit is intended to measure sustainability being infused throughout the institution, program or discipline-level orientations are not included in this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Outreach and Publications

Responsible Party

Nancy Whittaker

Associate Vice President
Administration, Financial Affairs

Criteria

Institution produces outreach materials and/or publications that foster sustainability learning and knowledge. The publications and outreach materials may include the following:

- A central sustainability website that consolidates information about the institution's sustainability efforts
 - A sustainability newsletter
 - A vehicle to publish and disseminate student research on sustainability
 - Building signage that highlights green building features
 - Food service area signage and/or brochures that include information about sustainable food systems
 - Signage on the grounds about sustainable groundskeeping strategies employed
 - A sustainability walking map or tour
 - A guide for commuters about how to use alternative methods of transportation
 - A guide for green living and incorporating sustainability into the residential experience
 - Regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat
 - Other
-

"---" indicates that no data was submitted for this field

Does the institution have a central sustainability website that consolidates information about the institution's sustainability efforts? :

Yes

A brief description of the central sustainability website that consolidates information about the institution's sustainability efforts :

The Go Green website consolidates information about the University of Alabama's sustainability efforts. The Go Green website features a blog with highlighting campus events, services, departments, awards, and news. The website also serves as a portal linking students, faculty, and staff with "green" curriculum, research, community groups, campus groups, and programs.

The website URL for the central sustainability website that consolidates information about the institution's sustainability efforts :

<http://gogreen.ua.edu/>

Does the institution have a sustainability newsletter? :

No

A brief description of the sustainability newsletter :

However, we provide information through the blog and Facebook page. We also advertise the blog in campus newsletters, websites, newspapers, the Crimson Ride (campus bus system), stadium screens, and campus building informational screens.

The website URL for the sustainability newsletter :

http://gogreen.ua.edu/index_1.html

Does the institution have a vehicle to publish and disseminate student research on sustainability? :

Yes

A brief description of the vehicle to publish and disseminate student research on sustainability :

C&BA Honors Program conducts sustainable research and holds events.

The website URL for the vehicle to publish and disseminate student research on sustainability :

<http://www.cba.ua.edu/bhp/projects>

Does the institution have building signage that highlights green building features? :

No

A brief description of building signage that highlights green building features :

The website URL for building signage that highlights green building features :

Does the institution have food service area signage and/or brochures that include information about sustainable food systems? :

Yes

A brief description of food service area signage and/or brochures that include information about sustainable food systems :

Bama Dining advertising for the Sustainability Package and hosts events about composting, waste disposal, recycling, and local food.

The website URL for food service area signage and/or brochures that include information about sustainable food systems :

[Campus Sustainability Data Collector](#) | [AASHE](#) | [Sierra Magazine](#)

Does the institution have signage on the grounds about sustainable grounds-keeping strategies employed? :

No

A brief description of signage on the grounds about sustainable grounds-keeping strategies employed :

The website URL for signage on the grounds about sustainable grounds-keeping strategies employed :

Does the institution have a sustainability walking map or tour? :

No

A brief description of the sustainability walking map or tour :

The website URL of the sustainability walking map or tour :

Does the institution have a guide for commuters about how to use alternative methods of transportation? :

Yes

A brief description of the guide for commuters about how to use alternative methods of transportation :

Crimson Ride information is included in the orientation packet and around campus. BamaBikes information is also provided to new students.

The website URL for the guide for commuters about how to use alternative methods of transportation :

http://financialaffairs.ua.edu/aux_svcs/transportation/

Does the institution have a guide for green living and incorporating sustainability into the residential experience? :

Yes

A brief description of the guide for green living and incorporating sustainability into the residential experience :

Energy Management provides an energy checklist online with energy saving tips and instructions.

The website URL for the guide for green living and incorporating sustainability into the residential experience :

<http://www.uafacilities.ua.edu/energy/checklist.htm>

Does the institution have regular coverage of sustainability in the main student newspaper (either through a regular

column or a reporter assigned to the sustainability beat)? :

No

A brief description of regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat :

At least twice a year the newspaper and news emails report on the campus recycling program, and the "green" efforts on campus.

The website URL for regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat :

<http://cw.ua.edu/?splash=0>

Does the institution produce another sustainability publication or outreach material not covered above? (1st material)

:

A brief description of this material :

The website URL for this material :

Does the institution produce another sustainability publication or outreach material not covered above? (2nd material) :

A brief description of this material :

The website URL for this material :

Does the institution produce another sustainability publication or outreach material not covered above? (3rd material) :

A brief description of this material :

The website URL for this material :

Does the institution produce another sustainability publication or outreach material not covered above? (4th material) :

New College

"---" indicates that no data was submitted for this field

Does the institution have an on-campus garden where students are able to gain organic farming and/or gardening experience? :

Yes

A brief description of the garden :

New College's Farm Program has partnered with local sustainable farming pioneers Jean Mills and Carol Eichelberger of Tuscaloosa CSA since 2001 to learn about, promote, and practice the joys of local, organic, nutritious food. Interest in the farm happenings is stronger than ever, and coordinators of the farm are seeking to expand activities to represent the University's commitment to sustainability on campus and in the community. Coordinators hope to create an on-campus farm space for the use of our classes, for research, for student garden plots, as a focal point of sustainability and as a creative space.

The website URL where information about the garden is available :

<http://www.as.ua.edu/nc/index.php>

Outdoor Recreation

"---" indicates that no data was submitted for this field

Does the institution have a wilderness or outdoors program that organizes hiking, backpacking, kayaking, or other outings for students and follows Leave No Trace principles? :

Yes

A brief description of the program :

The UA Outdoor Recreation program exists to provide an alternative healthy lifestyle choice to the UA community through guided outdoor trips, outdoor equipment rental, indoor climbing facility, bicycle repair, and bicycle rental programs.

The website URL where information about the program is available :

<http://urec.sa.ua.edu/ornews.cfm>

Themed Semester or Year

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Curriculum

This subcategory seeks to recognize institutions that have formal education programs and courses that address sustainability. One of the primary functions of colleges and universities is to educate students. By training and educating future leaders, scholars, workers, and professionals, higher education institutions are uniquely positioned to prepare students to understand and address sustainability challenges. Institutions that offer courses covering sustainability issues help equip their students to lead society to a sustainable future.

From the institution:

In addition to the courses listed in the co-curricular education section (above), other courses with "green" and sustainable subject matter are listed on the Go Green (www.gogreen.ua.edu) and Office of Sustainability websites (<http://financialaffairs.ua.edu/admin/sustainability/>). The Environmental Stewardship Committee is in the process of adding to the course listing, and it has requested deans of campus colleges to identify sustainability courses within their respective colleges.

Incentives for Developing Sustainability Courses

Sustainability Course Identification

Criteria

Part 1

Institution has developed a definition of sustainability in the curriculum. The definition was developed by a committee comprised of at least three faculty members who teach courses in different departments. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

In order to report on other STARS Curriculum credits, the definition of sustainability in the curriculum should distinguish between courses that focus or concentrate on the concept of sustainability throughout the course and courses that relate to an aspect of sustainability or include sustainability as part of the course.

- Sustainability-focused courses concentrate on the concept of sustainability, including its social, economic, and environmental dimensions, or examine an issue or topic using sustainability as a lens.
- Sustainability-related courses incorporate sustainability as a distinct course component or module or concentrate on a single sustainability principle or issue.

Part 2

Institution has identified its sustainability-focused and sustainability-related course offerings. A course is either sustainability-focused or sustainability-related; no course should be identified as both sustainability-focused and sustainability-related. Each institution is free to choose a methodology to identify sustainability courses that is most appropriate given its unique circumstances. Asking faculty or departments to self-identify sustainability courses using the definition in Part 1 or looking at the stated learning outcomes and course objectives associated with each course may provide a richer view of sustainability course offerings than simply reviewing course descriptions, but it is not required.

Part 3

Institution makes its sustainability course inventory publicly available online. The identification can be incorporated into the course catalog or posted as a stand-alone document.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability-Focused Courses

Criteria

Institution offers sustainability-focused academic courses.

This credit does not include continuing education and extension courses, which are covered by *PAE Credit 21: Sustainability in Continuing Education*.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability-Related Courses

Criteria

Institution offers sustainability-related academic courses.

This credit does not include continuing education and extension courses, which are covered by *PAE Credit 21: Sustainability in Continuing Education*.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Courses by Department

Criteria

Institution's academic departments (or equivalent) offer sustainability-related and/or sustainability- focused courses.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Learning Outcomes

Criteria

Institution's students graduate from programs that include sustainability as a required learning outcome or include multiple sustainability learning outcomes.

For this credit, learning outcomes at the course level count if the course is required to earn the degree. This credit includes graduate as well as undergraduate programs. For this credit, "programs" include majors, minors, concentrations, certificates, and other academic designations. Programs that include co-curricular aspects may count as long as there is an academic component of the program.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Undergraduate Program in Sustainability

Criteria

Institution offers at least one sustainability-focused undergraduate major, degree program, or equivalent.

The degree program does not have to include sustainability in its name to count for this credit. Environmental Studies programs, for example, count as long as the program covers the social, economic, and environmental dimensions of sustainability. A program that focuses exclusively on environmental or social issues, however, would not be sufficient to earn this credit.

Concentrations within a major (e.g. a concentration on sustainable business within the business major) do not count for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Graduate Program in Sustainability

Criteria

Institution offers at least one sustainability-focused degree program or equivalent for graduate students.

The degree program does not have to include sustainability in its name to count for this credit. Environmental Studies programs, for example, count for this credit as long as the program covers the social, economic, and environmental dimensions of sustainability. A program that focuses exclusively on environmental or social issues, however, would not be sufficient to earn this credit.

Concentrations within a degree program (e.g. a concentration on sustainable business within an MBA program) do not count for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Immersive Experience

Criteria

Institution offers at least one immersive, sustainability-focused educational study program. The program(s) may take place off-campus, overseas, or on-campus.

For this credit, the program meets one or both of the following criteria:

- it concentrates on sustainability, including its social, economic, and environmental dimensions or
- it examines an issue or topic using sustainability as a lens.

Immersive programs offered in partnership with outside entities may count for this credit. Programs offered exclusively by outside entities do not count for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Literacy Assessment

Criteria

Part 1

Institution conducts an assessment of the sustainability literacy of its students. The sustainability literacy assessment focuses on knowledge of sustainability topics, not values or beliefs.

Part 2

Institution conducts a follow-up assessment of the same cohort group using the same instrument.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Incentives for Developing Sustainability Courses

Criteria

Institution has an ongoing program or programs that offer incentives for faculty in multiple disciplines or departments to develop new sustainability courses and/or incorporate sustainability into existing courses or departments. The program aims to increase student learning of sustainability.

Incentives may include release time, funding for professional development, and trainings offered by the institution.

Incentives for expanding sustainability offerings in academic, non-credit, and/or continuing education courses count for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Research

This subcategory seeks to recognize institutions that are conducting research related to or focused on sustainability. Conducting research is a major function of many colleges and universities. By researching sustainability issues and refining theories and concepts, higher education institutions can continue to help the world understand sustainability challenges and develop new technologies, strategies, and approaches to address those challenges.

From the institution:

The Alabama Industrial Assessment's mission is to train engineers-of-tomorrow in energy-saving practices and assist manufacturers with energy conservation, waste reduction, and productivity increases. Their methods include student/faculty teams making assessment visits to selected manufacturers in Alabama and providing each with a detailed report of recommendations. Students are deeply involved in plant assessments and energy/productivity issues. The Industrial Assessment Centers are sponsored by the Department of Energy's Energy Efficiency and Renewable Energy division. There are 24 of these centers nationwide, and these are administered through the Field Manager's Office at Rutgers University. The Field Manager's Office maintains an extensive database of all IAC activities.

New College's Farm Program has partnered with local sustainable farming pioneers Jean Mills and Carol Eichelberger of Tuscaloosa CSA since 2001 to learn about, promote, and practice the joys of local, organic, nutritious food. Interest in the farm happenings is stronger than ever, and coordinators of the farm are seeking to expand activities to represent the University's commitment to sustainability on campus and in the community. Coordinators hope to create an on-campus farm space for the use of our classes, for research, for student garden plots, as a focal point of sustainability and as a creative space.

Internship Opportunities are present on campus. These include: Sustainable Agriculture Internships, Grassroots/Organizing Internships, Environmental Education Internships, Scientific Research Internships, and Animal Based Internships.

Credit
Sustainability Research Identification
Faculty Engaged in Sustainability Research
Departments Engaged in Sustainability Research
Sustainability Research Incentives
Interdisciplinary Research in Tenure and Promotion

Sustainability Research Identification

Criteria

Part 1

Institution has developed a definition of sustainability research. The definition was developed by a committee comprised of at least three faculty members from different departments who conduct research. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

Part 2

Institution has identified its sustainability research activities and initiatives. This research inventory should include all research centers, laboratories, departments, and faculty members whose research focuses on or is related to sustainability.

Part 3

Institution makes its sustainability research inventory publicly available online.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Faculty Engaged in Sustainability Research

Criteria

Institution's faculty members conduct research on sustainability topics.

Any level of sustainability research by a faculty member is sufficient to be included for this credit. In other words, a faculty member who conducts both sustainability research and other research may be included.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Departments Engaged in Sustainability Research

Criteria

Institution's academic departments include faculty members who conduct sustainability research.

Any level of sustainability research by a faculty member in a department is sufficient for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Research Incentives

Criteria

Part 1

Institution has an ongoing program to encourage students in multiple disciplines or academic programs to conduct research in sustainability. The program provides students with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and mentorships.

Part 2

Institution has an ongoing program to encourage faculty from multiple disciplines or academic programs to conduct research in sustainability topics. The program provides faculty with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and faculty development workshops.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Interdisciplinary Research in Tenure and Promotion

Criteria

Institution gives positive recognition to interdisciplinary, transdisciplinary, and multidisciplinary research during faculty promotion and tenure decisions.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Operations

Buildings

This subcategory seeks to recognize institutions that are taking steps to improve the sustainability performance of their buildings. Buildings are generally the largest user of energy and the largest source of greenhouse gas emissions on campuses. Buildings also use significant amounts of potable water. Institutions can design, build, and maintain buildings in ways that provide a safe and healthy indoor environment for inhabitants while simultaneously mitigating the building's impact on the outdoor environment.

From the institution:

The university has a green building policy emphasizing LEED design principles. Five buildings on campus meet LEED criteria, and four residence halls are Energy Star labeled. The university has installed building water metering, water-efficient laundry technology, and leak detection and reduction systems throughout campus. Porous pavement, retention ponds, and vegetated swales are utilized to manage stormwater.

Environmental Practices of Construction Administration include:

- The University actively recycles waste generated during construction such as cardboard, lumber and metals.
- Construction items are collected for reuse during building renovations and demolition. The reused items include brick, light poles, wheel stops, slate, trees, shrubs, HVAC and electrical equipment.
- All new and renovation construction projects have designated collection points for recycling.
- During building remodeling and construction, the HVAC ductwork is protected from dust by MERV 6 filters.
- All capital projects meet or exceed ASHRAE's fresh air ventilation requirements.
- Parking decks and perimeter lots have been built to promote a pedestrian campus.
- Bicycle paths and parking have been built to encourage bicycling.
- Bus lanes, bus stops and the Transit Hub have been built to facilitate transportation around campus and create a pedestrian-friendly environment.
- Low flow urinals are used in all construction projects. Low flow urinals use 1/3 the water of standard urinals.
- All projects are energy smart and follow the ANSI/ASHRAE/IESNA Standard 90.1-2007 Energy Standard for Buildings except Low-Rise Residential.
- Complete building commissioning is used on most capital projects.
- The University uses occupancy driven lighting controls in all its construction.
- The University uses its deferred maintenance plan to replace roofs, doors, windows, lighting fixtures and HVAC equipment with more energy efficient materials.
- Before, during and after construction the University uses Best Management Practices to minimize runoff and protect area waterways.
- To save water, the University uses the industry standard low flow faucets, water closets, and shower heads.
- Underground electrical distribution is utilized throughout the campus and provides lower impact on trees than overhead lines.
- Central energy plants are used because they have greater efficiency, lower noise pollution, and are more reliable.
- All fume hoods installed on campus are low flow high efficiency.
- To monitor the building energy use and problems with equipment, a web based building automation system is used.
- By using variable frequency drives (VFDs), the University saves pump and fan energy.
- To recover energy from exhausted air, the University uses desiccant and energy recovery wheels.
- All renovation construction projects are tested for the presence of hazardous materials. If found they are removed or properly mitigated.

Credit

Building Operations and Maintenance
Building Design and Construction
Indoor Air Quality

Building Operations and Maintenance

Criteria

Institution owns and operates buildings that are:

1) Certified under the LEED® for Existing Buildings: Operations & Maintenance (O&M) Green Building Rating System,

and/or

2) Operated and maintained in accordance with sustainable operations and maintenance guidelines and policies that cover the following:

- Impacts on the surrounding site
- Energy consumption
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Building Design and Construction

Criteria

Institution-owned buildings that were constructed or underwent major renovations in the past three years are:

1) Certified under the LEED® for New Construction and Major Renovations, LEED for Commercial Interiors, and/or LEED for Core and Shell Green Building Rating Systems,

and/or

2) Designed and built in accordance with green building guidelines and policies that cover the following topics:

- Impacts on the surrounding site
- Energy consumption
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Indoor Air Quality

Criteria

Institution has adopted an indoor air quality management policy, plan, and/or practices that include regular auditing or monitoring and a mechanism for occupants to register complaints. Policies and plans adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Climate

This subcategory seeks to recognize institutions that are measuring and reducing their greenhouse gas emissions. Global warming is expected to have myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are expected to be particularly pronounced for poor communities and countries.

From the institution:

The University of Alabama has achieved a 2 percent reduction in greenhouse gas emissions since 2007 despite a 13 percent increase in building space. To reduce energy use, the university has implemented temperature setbacks and has installed technologies such as steam trap systems, timers for temperature control, and energy-efficient data centers. The University has also launched awareness campaigns to encourage energy conservation.

Greenhouse Gas Emissions Reduction

Criteria

Institution reduced its net Scope 1 and Scope 2 GHG emissions per weighted campus user compared to a 2005 baseline.

For this credit, off-site, institution-catalyzed carbon offsets (i.e. those popularly known as “local offsets”) count in full. Purchased carbon offsets that have been verified by a third party may count towards a portion of the reduction. Purchased offsets that have not been third-party verified do not count.

To conduct a GHG emissions inventory, campuses may use any methodology and/or calculator that is consistent with the Greenhouse Gas Protocol's Corporate Accounting and Reporting Standards.

The baseline GHG emissions inventory should include the same emissions sources as the performance year emissions inventory.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Air Travel Emissions

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Local Offsets Program

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Dining Services

This subcategory seeks to recognize institutions that are supporting a sustainable food system. Modern industrial food production often has deleterious environmental impacts. Pesticides and fertilizers used in agriculture can contaminate ground and surface water, which has potentially dangerous impacts on wildlife and human health. Furthermore, the often long-distance transportation of food to institutions produces greenhouse gas emissions and other pollution. Additionally, farm workers are often paid substandard wages, subjected to harsh working conditions, and exposed to dangerous pesticides. Institutions can use their food purchases to support their local economies; encourage safe, environmentally-friendly farming methods; and help alleviate poverty for farmers.

Please note that while dining services can also play an important role in conserving energy and water, reducing waste, and purchasing environmentally preferable materials other than food, STARS measures these impacts across the institution instead of by department; therefore, the benefits of these actions are captured in the Energy, Water, Waste, and Purchasing subcategories, respectively.

From the institution:

Bama Dining Services has reduced its impact by more than 4,000 pounds per week through its composting initiative in which “green matter” from vegetable and fruit peels is delivered to the university’s arboretum to mix with the leaves or “brown matter” from the university’s grounds. In addition, 50 percent of the university’s food purchases are from local/organic sources, and plans for a community organic garden on campus are in the works. The University serves exclusively fair trade coffee. Dining services offers a beverage discount for the use of reusable mugs and has a trayless program.

Food and Beverage Purchasing

Responsible Party

Kristina Hopton-Jones
Director
Bama Dining Services

Criteria

This credit includes food and beverage purchases for on-campus dining services operated by the institution or the institution's primary on-site contractor. Institution purchases food and beverages that meet at least one of the following criteria:

- Grown and processed within 250 miles of the institution
- Third-party certified (USDA Certified Organic, Marine Stewardship Council Blue Ecolabel, Food Alliance, Fair Trade, Certified Humane Raised and Handled)

Food and beverage purchases that meet multiple criteria listed above should not be double-counted.

This credit includes food and beverage purchases for on-campus dining operations and catering services operated by the institution or the institution's primary dining services contractor (e.g. Aramark, Bon Appétit Management Company, Chartwells, Sodexo). On-site franchises, convenience stores, vending machines, or concessions are excluded from this credit unless they are operated by the institution or the institution's primary on-site contractor..

"---" indicates that no data was submitted for this field

Percentage of food expenditures that meet one or more of the criteria for this credit (0 - 100) :

21

A brief description of the sustainable food and beverage purchasing program :

Another way Bama Dining is becoming more sustainable is through local purchasing. All Bama Dining managers are required to purchase locally grown and produced products whenever available. Locally grown fruits and vegetables are purchased from Adams Produce. Bread is purchased from the local Tuscaloosa Flowers Bakery. Milk is purchased from the local Dairy Fresh distributor.

Does campus dining operations provide reusable containers for to-go food that are returned for cleaning and reuse? :

Yes

A brief description of the reusable to-go container program :

Bama Dining offers biodegradable and recyclable “grab-n-go” containers. These containers are also included in the Sustainability Package offered.

The website URL where information about the reusable to-go container program is available :

http://bamadining.ua.edu/pages/sustainability_package.html

Energy

This subcategory seeks to recognize institutions that are reducing their energy consumption through conservation and efficiency, and switching to cleaner and renewable sources of energy such as solar, wind, geothermal, and low-impact hydropower. For most institutions, energy consumption is the largest source of greenhouse gas emissions, which cause global warming. Global warming is expected to have myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are expected to be particularly pronounced for poor communities and countries. In addition to causing global warming, energy generation from fossil fuels, especially coal, produces air pollutants such as sulfur dioxide, nitrogen oxides, mercury, dioxins, arsenic, cadmium and lead. These pollutants contribute to acid rain as well as health problems such as heart and respiratory diseases and cancer. Coal mining and oil and gas drilling can also damage environmentally and/or culturally significant ecosystems. Nuclear power creates highly toxic and long-lasting radioactive waste. Large-scale hydropower floods habitat and disrupts fish migration.

Implementing conservation measures and switching to renewable sources of energy can help institutions save money and protect them from utility rate volatility. Renewable energy may be generated locally and allow campuses to support local economic development. Furthermore, institutions can help shape markets by creating demand for cleaner, renewable sources of energy.

From the institution:

To reduce energy use, the university has implemented temperature setbacks and has installed technologies such as steam trap systems, timers for temperature control, and energy-efficient data centers. The university has also launched awareness campaigns to encourage energy conservation.

The primary function of the Energy Management Department at The University of Alabama is to ensure that the University manages its utilities as effectively as possible. The office's objective is to contribute to the financial stability of the University by efficiently managing the University's energy use, while maintaining a quality environment that is conducive to work and study. Performance goals are established that reduce the consumption of energy and promote continuous improvement. The performance goal target is to reduce energy consumption per square foot of campus building space by 2 percent per year thru 2015.

Primary functions of the Energy Department include:

Promote UA's energy management program with faculty, staff, and students. Implement various energy reduction projects. Develop long term energy strategies than lessen the impact that energy consumption has on the University; both financially and environmentally. Monitor building systems to ensure efficient operation. Provide technical review of campus construction projects to ensure energy efficiency. Review building occupancy patterns and develop schedules.

Act as a liaison to the utility supply companies.

Collect, analyze, and report energy data.

Building Energy Consumption

Criteria

Institution has reduced its total building energy consumption per gross square foot of building space compared to a 2005 baseline.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

$$1 \text{ kWh} = 0.003412 \text{ MMBtu}$$

$$1 \text{ MWh} = 3.412 \text{ MMBtu}$$

$$1 \text{ therm} = 0.1 \text{ MMBtu}$$

$$1 \text{ kBtu} = 0.001 \text{ MMBtu}$$

$$1 \text{ ton-hour} = 0.012 \text{ MMBtu}$$

$$1 \text{ MJ} = 0.000948 \text{ MMBtu}$$

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Clean and Renewable Energy

Criteria

Institution supports the development and use of clean and renewable energy sources using any one or combination of the following options.

Option 1: Generating electricity from clean and renewable energy sources on campus and retaining or retiring the rights to the environmental attributes of such electricity. (In other words, if the institution has sold Renewable Energy Credits for the clean and renewable energy it generated, it may not claim such energy here). The on-site renewable energy generating devices may be owned and/or maintained by another party as long as the institution has contractual rights to the associated environmental attributes.

Option 2: Using renewable sources for non-electric, on-site energy generation, such as biomass for heating.

Option 3: Catalyzing the development of off-site clean and renewable energy sources (e.g. an off-campus wind farm that was designed and built to supply electricity to the institution) and retaining the environmental attributes of that energy.

Option 4: Purchasing the environmental attributes of electricity in the form of Renewable Energy Certificates (RECs) or other similar renewable energy products that are either Green-e Energy certified or meet Green-e Energy's technical requirements and are verified as such by a third party, or purchasing renewable electricity through the institution's electric utility through a certified green power purchasing option.

Option 5: Using cogeneration technologies to generate electricity more efficiently. Note: generating electricity using cogeneration technology and a renewable fuel, such as biomass, is considered Option 1 and should not be counted twice.

Since this credit is intended to recognize institutions that are generating new sources of clean and renewable energy, neither the electric grid mix for the region in which the institution is located nor the grid mix reported by the electric utility that serves the institution count for this credit.

Technologies that reduce the amount of energy used but do not generate renewable energy do not count for this credit. For example, daylighting, passive solar design, and ground-source heat pumps are not counted in this credit. The benefits of such strategies are captured by *OP Credit 5: Greenhouse Gas Emissions Reductions* and *OP Credit 7: Building Energy Consumption*.

Transportation fuels, which are covered by *OP Credit 14: Campus Fleet*, are not included in this credit.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

1 kWh = 0.003412 MMBtu

1 MWh = 3.412 MMBtu

1 therm = 0.1 MMBtu

1 kBtu = 0.001 MMBtu

1 ton-hour = 0.012 MMBtu

1 MJ = 0.000948 MMBTU

Grounds

This subcategory seeks to recognize institutions that plan and maintain their grounds with sustainability in mind. Beautiful and welcoming campus grounds can be planned, planted, and maintained in any region while minimizing the use of toxic chemicals, protecting wildlife habitat, and conserving water and resources.

From the institution:

The Grounds Department at the University of Alabama composts landscaping waste, reuses grass, replants trees, shrubs, and flowers on the campus grounds.

Bama Dining, UA Grounds, New College, and the UA Arboretum are collaborating on a composting program utilizing brown and green waste to make nutrient-rich soil compost. Leaves (brown matter) collected across UA are sent to the Arboretum rather than a land fill, and Bama Dining provides pre-consumer waste (green matter) in the form of vegetable stems and peels and fruit rinds. When these items are combined in long windrows, New College students and Arboretum personnel turn the compost so that it can "cook" to the appropriate temperature. As the compost "cooks", it breaks the waste down into a dark, rich soil that is superior to any man-made fertilizers. The logistics of collecting, transporting, and turning compost is a big task that has taken a lot of effort and coordination within the departments, but the end product is worth the time.

Purchasing

This subcategory seeks to recognize institutions that are using their purchasing power to help build a sustainable economy. Collectively, colleges and universities spend many billions of dollars on goods and services annually. Each purchasing decision represents an opportunity for institutions to choose environmentally and socially preferable products and services and support companies with strong commitments to sustainability.

From the institution:**Environmental Practices of Custodial Services**

- The department uses post consumer content/recycled paper products and can liners.
- The department purchases ultra-concentrated cleaning products in large quantities which are diluted through solution dispensers and applied from reusable containers which reduce transportation costs and disposal of ready-to-use-chemical containers.
- All of our general use products are considered non-hazardous to the environment.
- Plastic equipment, tools, and containers are manufactured from recycled plastic.

The Purchasing Department purchases paper from recycled content from Strickland Paper, Mac Paper, and Xpedx.

Credit
Computer Purchasing
Cleaning Products Purchasing
Office Paper Purchasing
Vendor Code of Conduct
Historically Underutilized Businesses
Local Businesses

Computer Purchasing

Criteria

Part 1

Institution has an institution-wide stated preference to purchase Electronic Product Environmental Assessment Tool (EPEAT) Silver or higher products. This can take the form of purchasing policies, guidelines, or directives. This credit does not include specialized computers for which no EPEAT certified products are available. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases Electronic Product Environmental Assessment Tool (EPEAT) Silver and/or Gold registered products for standard desktop and notebook/laptop computers and monitors. This credit does not include specialized computers for which no EPEAT certified products are available.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Cleaning Products Purchasing

Criteria

Part 1

Institution has an institution-wide stated preference to purchase Green Seal™ or EcoLogo™ certified cleaning products. The stated preference can take the form of purchasing policies, guidelines, or directives to purchase green cleaning products. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution's main cleaning or housekeeping department(s) and/or contractor(s) purchase Green Seal or EcoLogo certified cleaning products. This credit does not include cleaning products for which no Green Seal or EcoLogo certified products are available.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Office Paper Purchasing

Criteria

Part 1

Institution has an institution-wide stated preference to purchase recycled content office paper. This can take the form of purchasing policies, guidelines, or directives to purchase recycled content office paper. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases recycled content office paper.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Vendor Code of Conduct

Criteria

Institution has and acts on a vendor code of conduct or equivalent policy that sets expectations about the social and environmental responsibility of vendors with whom the institution does business. Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Historically Underutilized Businesses

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Local Businesses

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Transportation

This subcategory seeks to recognize institutions that are moving toward sustainable transportation systems. Transportation is a major source of greenhouse gas emissions and other pollutants that contribute to health problems such as heart and respiratory diseases and cancer. Due to disproportionate exposure, these health impacts are frequently more pronounced in low-income communities next to major transportation corridors. In addition, the extraction, production, and global distribution of fuels for transportation can damage environmentally and/or culturally significant ecosystems and may financially benefit hostile and/or oppressive governments.

At the same time, campuses can reap benefits from modeling sustainable transportation systems. Bicycling and walking provide human health benefits and mitigate the need for large areas of paved surface, which can help campuses to better manage storm water. Institutions may realize cost savings and help support local economies by reducing their dependency on petroleum-based fuels for transportation.

From the institution:

The university provides free bus service around campus and free shuttle service to off-campus locations. A ride-matching site is available to faculty and staff, and carpoolers can share the cost of a group permit. A bike-sharing program was started in 2008, and the university also partners with a car-sharing program.

Campus Fleet

Criteria

Institution supports alternative fuel and power technology by including in its motorized vehicle fleet (cars, trucks, tractors, buses) vehicles that are:

1. Gasoline-electric hybrid
2. Diesel-electric hybrid
3. Plug-in hybrid
4. 100 percent electric
5. Fueled with Compressed Natural Gas (CNG)
6. Hydrogen fueled
7. Fueled with B20 or higher biofuel for more than 6 months of the year; and/or
8. Fueled with E85 or higher ethanol for more than 6 months of the year.

For this credit, the institution's motorized fleet includes all institution-owned and operated vehicles that are used for transporting people and/or goods. Heavy construction equipment (e.g. excavators and pavers) and maintenance equipment (e.g. lawn-mowers and leaf blowers) are not included in this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Student Commute Modal Split

Criteria

Institution's students commute to and from campus using more sustainable options such as walking, bicycling, vanpooling or carpooling, taking public transportation, riding motorcycles or scooters, riding a campus shuttle, or a combination of these options. Students who live on campus should be included in the calculation based on how they get to and from their classes.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Employee Commute Modal Split

Criteria

Institution's employees (faculty, staff, and administrators) commute to and from campus using more sustainable options such as walking, bicycling, vanpooling or carpooling, taking public transportation, riding motorcycles or scooters, riding a campus shuttle, or a combination of these options. Employees who live on campus should be included in the calculation based on how they get to and from their workplace.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Bicycle Sharing

Responsible Party

Stephen Middleton

Graduate Assistant

Outdoor Recreation

"---" indicates that no data was submitted for this field

Does the institution have a bicycle-sharing program or participate in a local bicycle-sharing program? :

Yes

A brief description of the program, including an indication of its scope (e.g., the number of bicycles the program makes available, participation levels, etc.) :

BamaBikes is a Student Affairs initiative designed to give students cheap and easy access to bicycle transportation on the University's campus.

The website URL where information about the program, policy, or practice is available :

<http://bamabikes.ua.edu/>

Facilities for Bicyclists

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Carpool/Vanpool Matching

Responsible Party

Jan Nichols

Benefits Coordinator

Human Resources

"---" indicates that no data was submitted for this field

Does the institution participate in a carpool/vanpool matching program? :

Yes

A brief description of the program :

The costs of commuting are impacting UA employees' personal budgets and forcing people to seek ways to reduce fuel consumption in order to save money. The UA Human Resources Department is addressing this issue by offering the CommuteSmart online carpool matching program. Carpooling is an excellent way to save money by reducing gas consumption and car maintenance while also helping our environment.

What is CommuteSmart?

CommuteSmart is a program developed by the Regional Planning Commission of Greater Birmingham in 1999 to help alleviate traffic congestion and reduce air pollution in Jefferson and Shelby counties. The program has since grown and now encourages individuals throughout Alabama to change their commuting habits and educates them on cleaner modes of transportation. Some of these methods include carpooling, vanpooling, bicycling/walking, and transit.

"---" indicates that no data was submitted for this field

Does the institution participate in a car sharing program, such as ZipCar or HourCar? :

Yes

A brief description of the program :

The campus works with ZipCar and Zimride. Links to these services are located on the Go Green website, advertised for via email, Facebook, and university news sources.

The website URL where information about the program, policy, or practice is available :

<http://gogreen.ua.edu/>

Waste

This subcategory seeks to recognize institutions that are moving toward zero waste by reducing, reusing, recycling, and composting. These actions mitigate the need to extract virgin materials, such as trees and metals. It generally takes less energy and water to make a product with recycled material than with virgin resources. Reducing waste generation also reduces the flow of waste to incinerators and landfills which produce greenhouse gas emissions, can contaminate air and groundwater supplies, and tend to have disproportionate negative impacts on low-income communities. Waste reduction and diversion also save institutions costly landfill and hauling service fees. In addition, waste reduction campaigns can engage the entire campus community in contributing to a tangible sustainability goal.

From the institution:

Trash and Dumpster Service is provided by the Grounds Department which is responsible for service/installation of dumpsters, debris removal, and general campus grounds clean-up.

In 2011, the Recycling Department deferred 1,316.36 tons from the landfill. The Department also handles all confidential shredding which is recycled, recycles automotive equipment, cell phones, and computers and runs a program to reuse surplus office furniture.

Campus Mail collects printer cartridges, and Garage Services collects automobile batteries.

Due to regulatory issues, the Office of Environmental Health and Safety manages some of the recycling efforts on campus. This includes fluorescent bulbs, certain types of batteries and used motor oil.

Bama Dining at The University of Alabama recycles fryer oil from every location across campus to ensure that the waste is managed in an environmentally sound way. Over 1,000 gallons of used fryer oil is collected from UA kitchens for recycling every month (during Fall & Spring semester). A local company collects the oil and transports it to a facility where it is processed and refined into a reusable product.

Move-In Waste Reduction
Move-Out Waste Reduction

Waste Reduction

Criteria

Institution has implemented source reduction strategies to reduce total waste generation (garbage, recycling, and compost) per weighted campus user compared to a 2005 baseline.

Total waste generation includes all materials recycled, composted, and disposed of as trash except construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in *OP Credit 19: Construction and Demolition Waste Diversion*, *OP Credit 20: Electronic Waste Recycling Program*, and *OP Credit 21: Hazardous Materials Management*.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Waste Diversion

Responsible Party

Tony Johnson

Executive Director

Logistics & Support Services

Criteria

Institution diverts materials from the landfill or incinerator by recycling, composting, reusing, donating, or re-selling.

This credit does not include construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in *OP Credit 19: Construction and Demolition Waste Diversion*, *OP Credit 20: Electronic Waste Recycling Program*, and *OP Credit 21: Hazardous Materials Management*.

Submission Note:

The tons of material recycled does not include the reused, donated, resold or otherwise diverted materials that the Surplus Department handles each month. Surplus holds a sale of reusable furniture, bikes, electronics, and other materials each month which anyone can bid on.

"---" indicates that no data was submitted for this field

Materials recycled, composted, reused, donated, re-sold, or otherwise diverted :

1316.36 Tons

Materials disposed in a solid waste landfill or incinerator :

3244.80 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate :

Recycling increased by 181 percent since 2008 thanks to initiatives like Community Recycling since the April, 2011 tornadoes. The university is recycling more than 1,300 tons of recyclable material each year and has designated recycling areas in 100 percent of campus buildings. The Recycling program provides Drive Up recycling for the surrounding community and campus. The Executive Director attends and speaks at multiple conferences, schools, and businesses about UA's recycling program.

Construction and Demolition Waste Diversion

Criteria

Institution diverts non-hazardous construction and demolition waste from the landfill and/or incinerator.

Soil and organic debris from excavating or clearing the site do not count for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Electronic Waste Recycling Program

Responsible Party

Tony Johnson

Executive Director

Logistics & Support Services

Criteria

Part 1

Institution has a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution. Institution takes measures to ensure that the electronic waste is recycled responsibly.

Part 2

Institution has a program in place to recycle, reuse, and/or refurbish electronic waste generated by students. Institution takes measures to ensure that the electronic waste is recycled responsibly.

"---" indicates that no data was submitted for this field

Does the institution have a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution and take measures to ensure that the electronic waste is recycled responsibly? :

Yes

Does the institution have a program in place to recycle, reuse, and/or refurbish electronic waste generated by students and take measures to ensure that the electronic waste is recycled responsibly? :

Yes

A brief description of steps taken to ensure that e-waste is recycled responsibly, workers' basic safety is protected, and environmental standards are met :

The department of Property and Inventory Management collects and recycles cell phones, computers, monitors, printers, scanners, keyboards & mice. The Department of Property and Inventory Management holds a contract with Georgia Computers who collect the used computer equipment and handles the recycling of electronics.

A brief description of the electronic waste recycling program for institution-generated materials :

The department of Property and Inventory Management collects and recycles cell phones, computers, monitors, printers, scanners, keyboards & mice.

A brief description of the electronic waste recycling program for student-generated materials :

The container for cell phone recycling is located in Ferguson Center at the entrance to the Supe Store. Bring your used cell phones and have them recycled properly.

The website URL where information about the e-waste recycling program is available :

<http://financialaffairs.ua.edu/admin/lss/recycle/index.html>

Hazardous Waste Management

Criteria

Institution has strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seeks to minimize the presence of these materials on campus.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Materials Exchange

Responsible Party

Tony Johnson

Executive Director

Logistics & Support Services

"---" indicates that no data was submitted for this field

Does the institution have a surplus department or formal office supplies exchange program that facilitates reuse of materials? :

Yes

A brief description of the program :

The Surplus department holds surplus sales at least once a month through a bid process. The sale is advertised in the local paper, and all information and photos are provided on the surplus website.

The website URL where information about the program is available :

<http://surplus.ua.edu/>

Limiting Printing

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Materials Online

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Chemical Reuse Inventory

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Move-In Waste Reduction

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Move-Out Waste Reduction

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Water

This subcategory seeks to recognize institutions that are conserving water and making efforts to protect water quality. Pumping, delivering, and treating water is a major energy user, so institutions can help reduce energy consumption and the greenhouse gas emissions associated with energy generation by conserving water. Likewise, conservation and effective stormwater management are important in maintaining and protecting finite groundwater supplies. Water conservation and effective stormwater management also reduce the need for effluent discharge into local surface water supplies, which helps improve the health of local water ecosystems.

From the institution:

Porous pavement, retention ponds, and vegetated swales are utilized to manage stormwater. The university is also “going blue” as it has developed a number of initiatives to preserve local marine life.

Credit
Water Consumption
Stormwater Management
Waterless Urinals
Building Water Metering
Non-Potable Water Usage
Xeriscaping
Weather-Informed Irrigation

Water Consumption

Criteria

Institution has reduced its total water consumption per weighted campus user compared to a 2005 baseline.

Total water consumption includes both potable and non-potable water.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Stormwater Management

Criteria

Part 1

Institution has adopted a stormwater management policy, plan, and/or strategies that mitigate the stormwater runoff impacts of new construction, major renovation, and other projects that increase paved surface area on campus or otherwise significantly change the campus grounds.

The policy, plan, and/or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

The policy, plan, and/or strategies cover the entire campus. While the specific strategies or practices adopted may vary depending on project type and location, this credit is reserved for institutions that mitigate stormwater runoff impacts consistently during new construction. Implementing a strategy or strategies for only one new development project is not sufficient for this credit.

Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution has adopted a stormwater management policy, plan, or strategies that mitigate the stormwater runoff impacts of ongoing campus operations.

The policy, plan, or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

Though specific practices adopted may vary across the campus, the policy, plan, and/or strategies cover the entire institution. Implementing strategies for only one building or area of campus is not sufficient for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Waterless Urinals

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Building Water Metering

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Non-Potable Water Usage

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Xeriscaping

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Weather-Informed Irrigation

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Planning, Administration & Engagement

Coordination and Planning

This subcategory seeks to recognize colleges and universities that are institutionalizing sustainability by dedicating resources to sustainability coordination, incorporating sustainability into their primary campus plans, and developing plans to move towards sustainability. Staff and other resources help an institution organize, implement, and publicize sustainability initiatives. These resources provide the infrastructure that fosters sustainability within an institution. Strategic and physical campus plans guide an institution and its physical development. These important documents establish an institution's priorities and influence budgeting and decision making. Incorporating sustainability into these plans is an important step in making sustainability a campus priority and may help advocates implement sustainable changes. Sustainability plans and climate plans provide a road map for how to achieve sustainability goals.

From the institution:

The university president has charged the campus community to take responsibility for environmental stewardship in the University of Alabama's master plan. The Office of Sustainability was created in 2010 as a department under the Associate Vice President of Administration in Financial Affairs. The office employs a graduate assistant which serves as sustainability coordinator and web coordinator. The Office of Sustainability works closely with the Environmental Stewardship Committee which meets monthly to work on various sustainability initiatives. The Office of Sustainability also works with student groups and other campus departments by advertising and assisting in coordinating events.

Credit
Sustainability Coordination
Strategic Plan
Physical Campus Plan
Sustainability Plan
Climate Action Plan

Sustainability Coordination

Responsible Party

Nancy Whittaker

Associate Vice President
Administration, Financial Affairs

Criteria

Institution has a sustainability committee, office, and/or coordinator that are tasked by the administration or board of trustees to advise on and implement policies and programs related to sustainability on campus.

The committee, office, and/or coordinator focus on sustainability broadly (i.e. not just one sustainability issue, such as climate change) and cover the entire institution. A committee, office, or coordinator that focuses on just one department or school within the institution does not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution have a sustainability committee? :

Yes

The charter or mission statement of the committee or a brief description of the committee's purview and activities :

The Environmental Stewardship Committee advises the administration on institutional policies and practices that promote environmental stewardship at The University of Alabama. To fulfill its mission, the Committee will review practices that impact the environment and make recommendations balancing fiscal and environmental responsibility. The Committee will also educate the University community regarding the importance of adhering to best practices. Deliberations of the Committee will complement and not duplicate the work of the Campus Master Planning Committee and the health and Safety Committee.

Members of the committee, including affiliations :

Membership:

Dave Francko, Chair – Dean, Grad School & Assoc Provost, OAA

Mark Beeler – Univ Forester

Jason Blumenthal – Coord, Distance Ed, HES

M. Jenice Goldston – Prof, Elem Education

Andrew Goodliffe – Assoc Prof, Geological Sciences

Pauline Johnson – Prof, Env. Engineering

Shenavia Murphy – Coor of Mgt Info, Fac Planning & Design

Julie Shelton – Dir, Financial Acct & Reporting

Student Representatives:

Mallory Flowers - SGA Dir, Dept of Environmental Concerns

Caitlin McClusky - Pres, UA Environmental Council

Liaison Members:

Tim Leopard – Asst VP, Const. Admin

Hal Barrett – Dir, Env Health & Safety

Andy Beville – Assoc Dir, Housing/Res Communities

Douglas Behm – Univ Geologist

Greg McKelvey – Energy Manager, Facilities

Nancy Whittaker – Assoc VP for Admin, Fin. Affairs; Dir, Office of Sustainability

Tamara Stone – Grad Asst/Web Liaison, Office of Sustainability

The website URL where information about the sustainability committee is available :

<http://financialaffairs.ua.edu/admin/sustainability/committee.html>

Does the institution have a sustainability office? :

Yes

A brief description of the sustainability office :

By the incorporation of ideas expressing the importance of a sustainable environment into campus life, applications, academics and organizations, The University of Alabama can insure that it is an institution that will find ways to improve its services and operations. The mission of the Office of Sustainability is to provide ways to connect students, faculty, staff and the surrounding communities in order to strive for a better environment by ways of recycling, reducing consumption and educating others on the importance of sustainability.

The number of people employed in the sustainability office :

3

The website URL where information about the sustainability office is available :

<http://financialaffairs.ua.edu/admin/sustainability/>

Does the institution have a sustainability coordinator? :

Yes

Sustainability coordinator's name :

Tamara Stone

Sustainability coordinator's position title :

Graduate Assistant

A brief description of the sustainability coordinator's position :

Design and maintain the Go Green, and Office of Sustainability websites.

Create logos, advertisements, and signage for events, recycling information and notification.

Create and maintained the Go Green Sustainability Facebook page.

Serve as a liaison between the Environmental Stewardship Committee, Office of Sustainability, students, and campus groups.

Work with student groups and other campus departments on events and projects in regards to advertisement, providing information, technical support, and campus navigation of sustainable matters.

Gather and organize campus information for the Sightlines university report, the Green Report Card, and other requests for information.

The website URL where information about the sustainability coordinator is available :

<http://gogreen.ua.edu/>

Strategic Plan

Criteria

Institution's current, formally adopted strategic plan or equivalent guiding document includes sustainability at a high level. The plan covers the entire institution.

An amendment to the strategic plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a physical campus plan (which is covered in *PAE Credit 3: Physical Campus Plan*) nor an independent sustainability plan (which is covered in *PAE Credit 5: Sustainability Plan*) counts for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Physical Campus Plan

Criteria

Institution's current plan for its physical campus (commonly referred to as the campus master plan) includes sustainability at a high level.

An amendment to the plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a strategic plan (which is covered in *PAE Credit 2: Strategic Plan*) nor an independent sustainability plan (which is covered in *PAE Credit 4: Sustainability Plan*) counts for this credit.

Plans developed at the system level are eligible for this credit. Likewise, multiple plans which together cover the institution's entire physical campus are eligible for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Plan

Criteria

Institution has a sustainability plan that was developed with input from faculty, staff, and students. The plan includes measurable goals with corresponding strategies and timeframes to achieve the goals. The plan need not be formally adopted.

The plan covers multiple sustainability topics and issues. Plans focused exclusively on climate change, which are covered by *PAE Credit 5: Climate Plan*, are not eligible for this credit.

Strategic or master plans that cover sustainability may count for this credit if they meet the other criteria outlined above.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Climate Action Plan

Criteria

Institution has a formal plan to mitigate its greenhouse gas emissions. The plan includes a measurable, numerical goal or goals and a corresponding date or dates by which the institution aims to achieve its goal(s). The plan has been adopted by the institution's administration.

A formal sustainability plan (i.e. a plan that has been adopted by the administration) counts for this credit if it includes climate change goals, strategies, and corresponding timeframes. Such a plan may also count toward *PAE Credit 4: Sustainability Plan*.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Diversity and Affordability

This subcategory seeks to recognize institutions that are working to advance diversity and affordability on campus. In order to build a sustainable society, diverse groups will need to be able to come together and work collaboratively to address sustainability challenges. People of color and low-income communities tend to suffer disproportionate exposure to environmental problems. This environmental injustice happens as a result of unequal and segregated communities. To achieve environmental and social justice, society must work to address discrimination and promote equality. The historical legacy and persistence of discrimination based on racial, gender, religious, and other differences makes a proactive approach to promoting a culture of inclusiveness an important component of creating an equitable society. Higher education opens doors to opportunities that can help create a more equitable world, and those doors must be open through affordable programs accessible to all regardless of race, gender, religion, socio-economic status and other differences. In addition, a diverse student body, faculty, and staff provide rich resources for learning and collaboration.

From the institution:

Homegrown Alabama is a student-led group at The University of Alabama that seeks to educate students about the value of local produce, as well as to foster partnerships between local farmers and The University of Alabama each year. This market partners with SNAP/EBT for a Matching Program that allows people with limited means to purchase fresh, local produce.

The Recycling Department at The University of Alabama provides students and members of the community with the Drive Up Recycling program which is a large drop off location for cardboard, paper, plastic, aluminum, magazines, tin, and scrap metal.

Credit
Diversity and Equity Coordination
Measuring Campus Diversity Culture
Support Programs for Underrepresented Groups
Support Programs for Future Faculty
Affordability and Access Programs
Gender Neutral Housing
Employee Training Opportunities
Student Training Opportunities

Diversity and Equity Coordination

Criteria

Institution has a diversity and equity committee, office, and/or coordinator that are tasked by the administration or board of trustees to advise on and implement policies, programs, and trainings related to diversity and equity on campus.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Measuring Campus Diversity Culture

Criteria

Institution assesses attitudes about diversity and equity on campus and uses the results to guide policy, programs, and initiatives.

Institution may measure its culture of diversity and equity using one assessment for the entire institution or using separate assessments that taken together cover the entire institution.

Assessments conducted during the previous five years are eligible for this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Support Programs for Underrepresented Groups

Criteria

Institution has mentoring, counseling, peer support, affinity groups, academic support programs, or other programs in place to support underrepresented groups on campus.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Support Programs for Future Faculty

Criteria

Institution administers and/or participates in a program or programs to help build a diverse faculty throughout higher education.

Such programs could take any of the following forms:

- Teaching fellowships or other programs to support terminal degree students from underrepresented groups in gaining teaching experience. (The terminal degree students may be enrolled at another institution).
- Mentoring, financial, and/or other support programs to prepare and encourage undergraduate or other non-terminal degree students to pursue further education and careers as faculty members.
- Mentoring, financial, and/or other support programs for doctoral and post-doctoral students from underrepresented groups.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Affordability and Access Programs

Criteria

Institution has policies and programs in place to make it accessible and affordable to low-income students. Such policies and programs may include, but are not limited to, the following:

- Policies and programs to minimize the cost of attendance for low-income students
- Programs to equip the institution's faculty and staff to better serve students from low-income backgrounds
- Programs to prepare students from low-income backgrounds for higher education such as the federal TRIO programs
- Scholarships for low-income students
- Programs to guide parents of low-income students through the higher education experience
- Targeted outreach to recruit students from low-income backgrounds
- Other admissions policies or programs
- Other financial aid policies or programs

Institutions are not required to have programs or policies in each of the above areas in order to earn this credit. They may pursue the policies and programs that are appropriate for their context.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Gender Neutral Housing

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Employee Training Opportunities

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Student Training Opportunities

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Human Resources

This subcategory seeks to recognize institutions that have incorporated sustainability into their human resources programs and policies. This includes recognition for treating and remunerating their workers responsibly and fairly. An institution's people define its character and capacity to perform; and so, an institution's achievements can only be as strong as its community. An institution can bolster the strength of its community by making fair and responsible investments in its human capital. Such investments include offering benefits, wages, and other assistance that serve to respectfully and ethically compensate workers. Investment in human resources is integral to the achievement of a healthy and sustainable balance between human capital, natural capital, and financial capital.

In addition, this subcategory recognizes faculty and staff training and development programs in sustainability. Faculty and staff members' daily decisions impact an institution's sustainability performance. Equipping faculty and staff with the tools, knowledge, and motivation to adopt behavior changes that promote sustainability is an essential activity of a sustainable campus.

Credit
Sustainable Compensation
Employee Satisfaction Evaluation
Staff Professional Development in Sustainability
Sustainability in New Employee Orientation
Employee Sustainability Educators Program
Childcare
Employee Wellness Program
Socially Responsible Retirement Plan

Sustainable Compensation

Criteria

Institution evaluates, and updates as appropriate, its wages and benefits policies and its guidelines for contractors operating on campus to ensure that total compensation (wages plus benefits) for all on-campus workers is sufficient to enable these employees to meet their basic needs, as defined by the institution. This evaluation is completed at least once every three years.

Student workers are not covered by this credit.

While wages and total compensation set in the following ways may constitute sustainable compensation, institutions should conduct a basic needs assessment to ensure that the total compensation is adequate before claiming points for this credit:

- Paying prevailing wages for job type or classification
- Paying average or above average wages for the region or city where the institution is located
- Paying minimum wages or a set amount above the minimum wage

Policies and practices adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Employee Satisfaction Evaluation

Criteria

Institution conducts a survey or other evaluation that allows for anonymous feedback at least once every five years to measure employee satisfaction. The survey or equivalent may be conducted institution-wide or may be done by individual departments as long as all departments are covered by a survey. The institution has a mechanism in place to address issues raised by the evaluation.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Staff Professional Development in Sustainability

Criteria

Institution makes available training and/or other professional development opportunities in sustainability to all staff at least once per year.

Separate training opportunities for each department would count for this credit, as long as each staff member has an opportunity to learn about sustainability at least once per year.

It is not necessary that each staff member attend such trainings; the credit is based on making training *available* to all staff.

This credit applies to staff members only; it does not include faculty members.

The following training opportunities are not sufficient for this credit:

- Specialized training for a small group of staff
- The opportunity to participate in an institutional sustainability committee or group

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability in New Employee Orientation

Criteria

Institution covers sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Employee Sustainability Educators Program

Criteria

Institution administers or oversees an ongoing faculty/staff peer-to-peer sustainability outreach and education program. In the program, employee sustainability educators are formally designated and receive formal training or participate in an institution-sponsored orientation. The institution offers financial or other support to the program.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Socially Responsible Retirement Plan

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Investment

This subcategory seeks to recognize institutions that make investment decisions that promote sustainability. Most institutions invest some of their assets in order to generate income. Together, colleges and universities invest hundreds of billions of dollars. Schools with transparent and democratic investment processes promote accountability and engagement by the campus and community. Furthermore, institutions can support sustainability by investing in companies and funds that, in addition to providing a strong rate of return, are committed to social and environmental responsibility. Investing in these industries also supports the development of sustainable products and services. Finally, campuses can engage with the businesses in which they are invested in order to promote sustainable practices.

Throughout this subcategory, the term “sustainable investment” is inclusive of socially responsible, environmentally responsible, ethical, impact, and mission-related investment.

Credit
Committee on Investor Responsibility
Shareholder Advocacy
Positive Sustainability Investments
Student-Managed Sustainable Investment Fund
Sustainable Investment Policy
Investment Disclosure

Committee on Investor Responsibility

Criteria

Institution has a formally established and active CIR or similar body that makes recommendations to the Board of Trustees on socially and environmentally responsible investment opportunities across asset classes, including proxy voting. The body has multi-stakeholder representation, which means its membership includes faculty, staff, and students and may include alumni, trustees, and/or other parties.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

A general committee that oversees the institution's investments does not count for this credit unless social and environmental responsibility is an explicit part of its mission and/or agenda.

This credit applies to institutions with endowments of US \$1 million or larger. Institutions with endowments totaling less than US \$1 million may choose to omit this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Shareholder Advocacy

Criteria

There are two possible approaches to earning this credit.

1) Institution filed or co-filed one or more shareholder resolutions that address sustainability or submitted one or more letters about social or environmental responsibility to a company in which it holds investments, during the previous three years.

and/or

2) Institution has conducted a negative screening of its entire investment pool within the last three years. This could take the form of prohibiting investment in an industry (e.g. tobacco or weapons manufacturing) or participating in a divestment effort (e.g. companies operating in South Africa during apartheid). The negative screen includes selling all but \$2,000 or less of the affected direct holdings and writing a letter to all fund managers encouraging them to remove affected holdings as well.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the shareholder advocacy activities of those entities.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Positive Sustainability Investments

Criteria

Institution invests in any of the following:

- Sustainable industries, such as renewable energy or sustainable forestry
- Businesses selected for exemplary sustainability performances
- Sustainability investment funds, such as a renewable energy investment fund
- Community development financial institutions (CDFI)
- Socially responsible mutual funds with positive screens.

Investment in a socially responsible mutual fund with only negative screens (i.e. one that excludes egregious offenders or certain industries, such as tobacco or weapons manufacturing) does not count for this credit.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Student-Managed Sustainable Investment Fund

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainable Investment Policy

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Investment Disclosure

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Public Engagement

This subcategory seeks to recognize institutions that give back to their communities through community service, engagement, and partnerships. Volunteerism and the sense of compassion that community service helps develop are fundamental to achieving sustainability. From tutoring children to removing invasive species to volunteering at a food bank, students, faculty, and staff can make tangible contributions that address sustainability challenges through community service. Community engagement can help students develop leadership skills while deepening their understandings of practical, real-world problems. Institutions can contribute to their communities by harnessing their financial and academic resources to address community needs. For example, faculty research and courses can focus on how to address community problems. In addition, colleges and universities can offer incentives for their graduates to pursue careers that fill community needs, and schools can use their prominence to advocate for sustainability outside of their institutions.

From the institution:

Sustainability is incorporated into new student orientation and a green guide is distributed to new students. The University also employs two paid sustainability interns. The Student Government Association Department of Environmental Concerns works on various campaigns, including the Greeks for Green competition and Game Day Recycling program.

Community projects and partnerships include Homegrown Alabama which is a student-led group at The University of Alabama that seeks to educate students about the value of local produce, as well as to foster partnerships between local farmers and the University of Alabama each year. This market partners with SNAP/EBT for a Matching Program which allows people with limited means to purchase fresh, local produce. The group's other partners include: Canterbury Episcopal Chapel, Alabama Farmers Market Authority, UA Office of Community Affairs, Students for Sustainability, New College, the Center for Community-Based Partnerships and the SGA Department of Environmental Concerns.

The University of Alabama also houses an Engineers Without Borders chapter, and works with Legacy: Partners in Environmental Education.

The Recycling Department at The University of Alabama provides students and members of the community with the Drive Up Recycling program, which is a large drop off location for cardboard, paper, plastic, aluminum, magazines, tin, and scrap metal. The Recycling Department also provides Gameday recycling, and it visits local schools educating students on the importance of recycling and smart product purchasing.

"---" indicates that no data was submitted for this field

Does the institution participate in community sustainability partnerships that meet the criteria for this credit? :

Yes

A brief description of the institution's sustainability partnerships with the local community :

Community projects and partnerships include Homegrown Alabama which is a student-led group at The University of Alabama that seeks to educate students about the value of local produce, as well as to foster partnerships between local farmers and the University of Alabama each year. This market partners with SNAP/EBT for a Matching Program which allows people with limited means to purchase fresh, local produce. The groups other partners include: Canterbury Episcopal Chapel, Alabama Farmers Market Authority, UA Office of Community Affairs, Students for Sustainability, New College, the Center for Community-Based Partnerships and the SGA Department of Environmental Concerns.

The University of Alabama also houses an Engineers Without Borders chapter, and works with Legacy: Partners in Environmental Education.

The Recycling Department at The University of Alabama provides students and members of the community with the Drive Up Recycling program, which is a large drop off location for cardboard, paper, plastic, aluminum, magazines, tin, and scrap metal. The Recycling Department also provides Gameday recycling, and it visits local schools educating students on the importance of recycling and smart product purchasing.

Inter-Campus Collaboration on Sustainability

Criteria

Institution collaborates with other colleges and universities to support and help build the campus sustainability community.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability in Continuing Education

Criteria

Part 1

Institution offers continuing education courses that are focused on or related to sustainability.

Courses that can be taken for academic credit are not included in this credit. They are covered by the *Curriculum* subcategory.

Part 2

Institution has a sustainability-related certificate program through its continuing education or extension department.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Community Service Participation

Criteria

Institution engages its student body in community service, as measured by the percentage of students who participate in community service.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Community Service Hours

Criteria

Institution engages students in community service, as measured by average hours contributed per full-time student per year.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Policy Advocacy

Criteria

Institution advocates for federal, state, or local public policies that support campus sustainability or that otherwise advance sustainability.

The policy advocacy must be done by the institution, not by students or a student group.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Trademark Licensing

Criteria

Part 1

Institution is a member of the Fair Labor Association or Worker Rights Consortium.

Part 2

Institution has signed on to participate in the Designated Suppliers Program.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Graduation Pledge

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Community Service on Transcripts

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

College of Human Environmental Studies

"---" indicates that no data was submitted for this field

Does the institution host a farmers' market for the community? :

Yes

A brief description of the farmers' market :

Community projects and partnerships include Homegrown Alabama which is a student-led group at The University of Alabama that seeks to educate students about the value of local produce, as well as to foster partnerships between local farmers and the University of Alabama each year. This market partners with SNAP/EBT for a Matching Program which allows people with limited means to purchase fresh, local produce. The groups other partners include: Canterbury Episcopal Chapel, Alabama Farmers Market Authority, UA Office of Community Affairs, Students for Sustainability, New College, the Center for Community-Based Partnerships and the SGA Department of Environmental Concerns.

The website URL where information about the market is available :

Innovation

Innovation

These credits recognize institutions that are seeking innovative solutions to sustainability challenges and demonstrating sustainability leadership in ways that are not otherwise captured by STARS.

From the institution:

Campus Mail provides Reusable Items. Everyday Campus Mail receives hundreds of rubber bands, binder clips, paper clips and plastiklips. Instead of throwing away these office supplies, Campus Mail packages and delivers them free of charge to UA departments for reuse.

Bama Dining offers a Sustainability Package which includes a reusable to-go box, a reusable mug, an organic sustainable t-shirt, a reusable grocery bag, 5 lbs of food donated from Bama Dining to West Alabama Food Bank, and a tree planted in the student's name through American Forests.

Credit
Innovation 1
Innovation 2
Innovation 3
Innovation 4

Innovation 1

Criteria

- 1) Innovation credits are reserved for new, extraordinary, unique, groundbreaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.
- 2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.
- 3) The innovative practice, policy, program, or outcome should have occurred within the past three years.
- 4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.
- 5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.
- 6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.
- 7) Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.
- 8) While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit.
- 9) Outcomes, policies, and practices that are innovative for the institution's region or school type are eligible for innovation credits.
- 10) When the innovation is part of a partnership, the summary provided must clearly describe the institution's role in the innovation.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Innovation 2

Criteria

- 1) Innovation credits are reserved for new, extraordinary, unique, groundbreaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.
- 2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.
- 3) The innovative practice, policy, program, or outcome should have occurred within the past three years.
- 4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.
- 5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.
- 6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

Supplemental

Supplemental Data

The supplemental section includes reporting fields that are not part of STARS, but that have been requested by campus survey organizations (the Sustainable Endowments Institute, The Princeton Review, and Sierra magazine). Institutions that wish to share their data with one or more of these organizations should complete the fields in full or contact the relevant organization(s) for guidance regarding minimum reporting requirements.

New Student Orientation

Criteria

Institution provides details about how it incorporates sustainability into new student orientation.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Food Education

Criteria

Institution provides education about eco-positive food and gardening techniques.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Food and Beverage Purchases

Criteria

Institution provides details of its food and beverage purchases.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Confinement-Free Food Purchases

Criteria

Institution provides details of its confinement-free animal product purchases.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Vegetarian-Fed Food Purchases

Criteria

Institution provides details of its vegetarian-fed animal product purchases.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Hormone-Free Food Purchases

Criteria

Institution provides details of its hormone-free animal product purchases.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Seafood Purchases

Criteria

Institution provides details of seafood products purchased that meet Marine Stewardship Council Blue Ecolabel standards and/or Monterey Bay Aquarium Seafood Watch guidelines.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Dishware

Responsible Party

Kristina Hopton-Jones
Director
Bama Dining Services

Criteria

Institution provides details of the dishware its provides at its dining services locations.

"---" indicates that no data was submitted for this field

Does the institution offer reusable dishware at its dining services locations? :

Yes

Does the institution offer plastic dishware at its dining services locations? :

Yes

Does the institution offer polystyrene (Styrofoam) dishware at its dining services locations? :

No

Does the institution offer post-consumer recycled content dishware at its dining services locations? :

Yes

Does the institution offer biodegradable / compostable dishware at its dining services locations? :

Yes

Does the institution offer other types of dishware at its dining services locations? :

Provide a brief description. :

Energy Initiatives

Criteria

Institution provides details about its energy initiatives.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Energy Use by Type

Criteria

Institution reports its energy use by type.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Procurement

Criteria

Institution provides details about its procurement efforts.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Bike Sharing

Responsible Party

Stephen Middleton

Graduate Assistant

Outdoor Recreation

Criteria

Institution reports the number of bicycles available through bike sharing programs.

Submission Note:

The BamaBikes Program is a Student Affairs initiative designed to provide a low-cost bicycle rental system so that members can move around campus in a quick, safe, and sustainable fashion. The program was developed to help students move around campus in a quick, safe, and sustainable fashion. Modeled after similar initiatives at Colorado State and Duke University, BamaBikes draws upon the best features of bicycle rental systems from across the country to bring you an effective and efficient means of public transportation.

"---" indicates that no data was submitted for this field

The number of bicycles available through bike sharing programs :

Water Initiatives

Criteria

Institution provides details about its water initiatives.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Endowment

Criteria

Institution provides details about its endowment.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Sustainability Staffing

Responsible Party

Nancy Whittaker

Associate Vice President
Administration, Financial Affairs

Criteria

Institution reports the amount of weekly time worked by people employed in the sustainability office, if applicable (in full-time equivalent).

"---" indicates that no data was submitted for this field

The amount of weekly time worked by people employed in the sustainability office (in full-time equivalent) :

40

FTE staff on payroll :

2

FTE student intern/fellow :
